## About

Listy is a web app that allows people to make their own checklists and share it with any other member (Listlet) of Listy if they choose.

## Technologies Employed

## Use Case

## Conclusion

- Listy's purpose is to help people collaborate on checklist making.
- This web app has both a client and server side. It also resizes effectively for mobile devices.
- We have a database to store users and their checklists.
- Store items under each checklist.
- Users can share their checklists with others.
